Application Procedure
for
Foreign Student Admission
to

Department of Engineering
Graduate School of Sustainability Science
Master’s Program, 2017※

( April entrance )

Tottori University
4-101 Koyama-Minami, Tottori, 680-8552 Japan
Phone: +81-857-31-6761

※Any important change of the contents in this document will be notified by posting it on the following Web site: http://eng.tottori-u.ac.jp/gseng
This “Application Procedure for Foreign Student Admission” includes information both for First Period Application and for Second Period Application.

Applicants for First Period Application should refer to the pages 1 – 5, 11, and the subsequent pages.

Applicants for Second Period Application should refer to the page 6 – 11, and the subsequent pages.

2. Qualifications for Application

Non-Japanese citizens who meet one of the following qualifications are eligible for application.

1. Have graduated from an accredited university abroad, or are expected to graduate by the end of March, 2017 and completed 16-years schooling in foreign countries.
2. Have been approved by the Japanese Minister of Education, Science, Sports and Culture of Japan.
3. Have been approved by Department of Engineering, Graduate School of Sustainability Science, Tottori University, as having academic ability equivalent to university graduates and will become 22 years old or more by March 31, 2017.※1
4. Have completed or be expected to complete the program (limited to the ones that their graduates are regarded as completion of 16-years school education of the foreign country) provided by the educational institution that is founded as a part of the formal education system of the foreign country, and is also specified elsewhere by Minister of Education, Culture, Sports, Science and Technology of Japan, on or before March 31 of 2017.
5. Have received or be expected to receive a degree equivalent to bachelor's degree by completing the program of more than 3 years (including degrees obtained by completing the distance education program provided by the foreign university while residing in Japan, or by completing the program specified by Qualification 4 above at the educational institution founded on the formal education system of the foreign country) at university or other forms of school in foreign country (limited to the institutions specified by Minister of Education, Culture, Sports, Science and Technology of Japan, as having being assessed their activities including research and education by the body certified by the residing government or the relevant institutions, or as being equivalent), on or before March 31 of 2017.

※1 Applicants who fall in the qualification 3 above should submit their admission application (Form 1), past professional and research record (Form 2), Transcript of degree or graduation certificate issued by the university or college attended, and Transcript of scholastic record issued by the university or college attended. The submission should be from Thursday, September 1, 2016 to Wednesday, September 7, 2016. Qualification review results will be mailed to the applicants on Tuesday, September 13, 2016.
Note.

1. Most lectures in the Department of Engineering, Graduate School of Sustainability Science, Tottori University are offered in Japanese. Applicants should note that it is essential to achieve a sufficient mastery of the Japanese language before their admission.

2. Before applying to the Graduate School (master’s program), applicants are advised to take one or two semesters of study as Postgraduate Research Students (non-degree program) ※2 under a desired supervisor to fill in gaps in their engineering education and to acquire a good command of Japanese language in preparation for the entrance examinations.

3. Application Procedure

3.1 Choice of Course and Field

The applicant must choose one of the Courses and one of the Fields in Section 1 and write them in the appropriate columns of the application form (Form 1).

3.2 Application Period

Applications will be accepted from 9:00 to 17:00 from Friday, September 16 to Friday, September 23, 2016 at the Student Section in the Faculty of Engineering, Tottori University. Those who send applications by mail should use registered mail and write 'Application Forms for Master’s program' in red on the front of the envelope. All applications must reach Student Section in Faculty of Engineering, Tottori University, no later than 17:00 on Friday, September 23, 2016. Any applications received after this due will not be accepted.

3.3 Application Documents

Applicants should submit the following documents to the Student Section in the Faculty of Engineering, Tottori University, during the above-mentioned application period.

1. Application Form for Admission (Form 1)
2. Admission Cards with photos (in duplicate)
3. Transcript of degree or graduation certificate issued by the university or college that you have attended.
4. Transcript of scholastic record issued by the university or college that you have attended. This should be a confidential communication between the university or college that you have attended and Tottori University.
5. Letter of Recommendation from the President, Dean or Department Chairman of the university or college that you have attended.
7. Certificate of Residence, copy of Residence Card, or copy of Passport.
   (Foreigners residing in Japan should submit a copy of their Residence Card (both sides) or a Certificate of Residence issued by the city or town office you live in. Other foreigners should submit a copy of your passport.)
8. Examination fee of 30,000 yen ※3

※2 See Appendix.
※3 Complete the payment at a nearby bank in Japan by the slip enclosed in this booklet. Then, stick the payment receipt slip (the right part of the form: 検定料振込済証明書) on the Application Payment Confirmation Slip part in Form 1.

Payment Period:
3.4 Note

1. Incomplete or incorrect application forms and documents will not be accepted.
2. The above mentioned items of the application are not substitutable once they have been received by the Student Section in the Faculty of Engineering, Tottori University.
3. Under any circumstances, the application forms, documents and examination fee cannot be returned to the applicant once they have been received by the Student Section in Faculty of Engineering, Tottori University.
4. Application should be written either in block capitals or typed.

The First Period Application is from Thursday, September 8 to Friday, September 23, 2016.
4. Screening

4.1 Screening Procedure

Preliminary screening for admission will be made on the basis of the submitted documents. Applicants who pass this preliminary screening will be notified to take a subsequent written examination in the following subjects and an oral examination.

1. Course of Mechanical and Aerospace Engineering
   Thursday, September 29, 2016
   (1) Mathematics / 9:00-11:00
   (2) **Mechanical and Aerospace Engineering Field**
       One from the following subjects / 12:30-14:30
       • Physics for Mechanical Engineering
       • Mechanics
   (3) Oral Examination / 15:00-

2. Course of Information and Electronics
   Thursday, September 29, 2016
   (1) **Information and Knowledge Engineering Field**
       Computer Architecture, Algorithm and Data Structures / 9:00-11:00
       **Electrical and Electronic Engineering Field**
       Electromagnetic Theory, Electric and Electronic Circuits / 9:00-11:00
   (2) Mathematics / 11:30-13:30
   (3) Oral Examination / 15:00-

3. Course of Chemistry and Biotechnology
   Thursday, September 29, 2016
   (1) **Applied Chemistry Field**
       Organic Chemistry, Inorganic Chemistry, Physical Chemistry / 9:00-13:00
   **Biotechnology Field**
       Two from the following four subjects / 9:00-13:00
       • Microbiology
       • Biochemistry
       • Organic Chemistry
       • Physical Chemistry / Structural Biology
   (2) Oral Examination / 14:00-

4. Course of Social Systems and Civil Engineering
   Thursday, September 29, 2016
   (1) Mathematics / 9:00-10:30
   (2) **Social Systems Engineering Field**
       Social Systems Engineering / 10:45-11:55
   **Civil Engineering Field**
       One from the following four subjects / 13:00-14:10
       • Structural Mechanics
       • Hydraulics
       • Soil Mechanics
       • Structural Materials and Concrete Structure
   (3) Oral Examination
       Social Systems Engineering Field / 13:00-
       Civil Engineering Field / 14:40-

Venue: Department of Engineering, Graduate School of Sustainability Science (Faculty of Engineering Building), Tottori University, 4-101 Koyama-Minami, Tottori 680-8552, Japan
Note.

1. Applicants should bring the Admission Card with them to the venue of examination. The Card should be placed on the designated desk during the written examination.

2. Applicants are requested to enter the examination room by 8:45. The information regarding examination rooms and others, will be posted on the notice board of the Department of Engineering, Graduate School of Sustainability Science (at the main entrance of the Faculty of Engineering Building) from 15:00 the day before the written examination.

3. Late-comer to the examination may be allowed to take examination only if he or she arrives the venue of examination no later than 30 minutes after the examination starting time.

4.2 Preliminary Consultation for Handicapped Applicants

Applicants with physical disabilities who need some specific assistance during the examination as well as study terms after entrance, must submit a document (written in arbitral format) including the following items and a medical certificate prepared by a physician to Student Section in Faculty of Engineering, Tottori University, by Friday, September 9, 2016, during the examination and while attending graduate school.

1. Name of applicant, address and telephone number
2. School from which you graduated
3. Course and Field of your choice
4. Type and degree of disability
5. Attention needed upon examination
6. Attention needed while attending graduate school
7. Measures and supports provided at previous schools
8. Conditions of daily life

In addition, if Tottori University sees the need, the university will have interviews with the applicants or people from their current or previous schools, or other related persons, who are able to speak on behalf of the applicants.

5. Notification of Results

The results of the screening will be put on the web page of Tottori University around 11:00 on Wednesday, October 19, 2016. (http://www.adm.zim.tottori-u.ac.jp/). The notifications of acceptance will be mailed to the successful applicants, except for the student currently attending Tottori University to whom the notification will be handed directly at Student section in Faculty of Engineering. Inquiries about the results by other means such as phone and e-mail are not available. Detailed information concerning registration after acceptance will be informed to the successful applicants in early March, 2017.
6. Admission and Tuition Fees

1. Admission Fee※4: 282,000 yen (planned amount. Must be paid at the time of registration. Not refundable.)
2. Tuition Fee※4: 535,800 yen for one academic year (planned amount)

Note.
1. University admission and tuition fees above are estimates only. In cases where fee adjustments are announced while students are entering university or when they are already enrolled, students will be requested to pay the adjusted fees.
2. The method for paying tuition fee will be announced later when you are guided for university entrance procedure.

7. Inquiries

Any inquiries related to the application to Department of Engineering, Graduate School of Sustainability Science, Tottori University, should be made by mail to Student Section in Faculty of Engineering, Tottori University, given below.

Student Section in Faculty of Engineering
Department of Engineering, Graduate School of Sustainability Science
Tottori University
4-101 Koyama-Minami, Tottori, 680-8552 Japan
Phone: +81-857-31-6761
E-mail: en-kyoumu@adm.tottori-u.ac.jp

※4 Foreign students supported by the scholarship from Japanese Government are exempt from the admission and the tuition fees.

2. Qualifications for Application

Non-Japanese citizens who meet one of the following qualifications are eligible for application.

1. Have graduated from an accredited university abroad, or are expected to graduate by the end of March, 2017 and completed 16-years schooling in foreign countries.
2. Have been approved by the Japanese Minister of Education, Science, Sports and Culture of Japan.
3. Have been approved by Department of Engineering, Graduate School of Sustainability Science, Tottori University, as having academic ability equivalent to university graduates and will become 22 years old or more by March 31, 2017.※1
4. Have completed or be expected to complete the program (limited to the ones that their graduates are regarded as completion of 16-years school education of the foreign country) provided by the educational institution that is founded as a part of the formal education system of the foreign country, and is also specified elsewhere by Minister of Education, Culture, Sports, Science and Technology of Japan, on or before March 31 of 2017.
5. Have received or be expected to receive a degree equivalent to bachelor's degree by completing the program of more than 3 years (including degrees obtained by completing the distance education program provided by the foreign university while residing in Japan, or by completing the program specified by Qualification 4 above at the educational institution founded on the formal education system of the foreign country) at university or other forms of school in foreign country (limited to the institutions specified by Minister of Education, Culture, Sports, Science and Technology of Japan, as having being assessed their activities including research and education by the body certified by the residing government or the relevant institutions, or as being equivalent), on or before March 31 of 2017.

※1 Applicants who fall in the qualification 3 above should submit their admission application (Form 1), past professional and research record (Form 2), Transcript of degree or graduation certificate issued by the university or college attended, and Transcript of scholastic record issued by the university or college attended. The submission should be from Thursday, October 20, 2016 to Tuesday, October 25, 2016. Qualification review results will be mailed to the applicants on Tuesday, November 1, 2016.
Note.
1. Most lectures in the Department of Engineering, Graduate School of Sustainability Science, Tottori University are offered in Japanese. Applicants should note that it is essential to achieve a sufficient mastery of the Japanese language before their admission.
2. Before applying to the Graduate School (master's program), applicants are advised to take one or two semesters of study as Postgraduate Research Students (non-degree program) under a desired supervisor to fill in gaps in their engineering education and to acquire a good command of Japanese language in preparation for the entrance examinations.

3. Application Procedure

3.1 Choice of Course and Field
The applicant must choose one of the Courses and one of the Fields in Section 1 and write them in the appropriate columns of the application (Form 1).

3.2 Application Period
Applications will be accepted from 9:00 to 17:00 from Tuesday, November 8 to Friday, November 11, 2016 at the Student Section in the Faculty of Engineering, Tottori University. Those who send applications by mail should use registered mail and write ‘Application Forms for Master’s program’ in red on the front of the envelope. All applications must reach Student Section in Faculty of Engineering, Tottori University, no later than 17:00 on Friday, November 11, 2016. Any applications received after this due will not be accepted.

3.3 Application Documents
Applicants should submit the following documents to the Student Section in the Faculty of Engineering, Tottori University, during the above-mentioned application period.

1. Application Form for Admission (Form 1)
2. Admission Cards with photos (in duplicate)
3. Transcript of degree or graduation certificate issued by the university or college that you have attended.
4. Transcript of scholastic record issued by the university or college that you have attended. This should be a confidential communication between the university or college that you have attended and Tottori University.
5. Letter of Recommendation from the President, Dean or Department Chairman of the university or college that you have attended.
7. Certificate of Residence, copy of Residence Card, or copy of Passport.
   (Foreigners residing in Japan should submit a copy of their Residence Card (both sides) or a Certificate of Residence issued by the city or town office you live in. Other foreigners should submit a copy of your passport.)
8. Examination fee of 30,000 yen.

※2 See Appendix.
※3 Complete the payment at a nearby bank in Japan by the slip enclosed in this booklet. Then stick the payment receipt slip (the right part of the form: 検定料振込済証明書) on the Application Payment Confirmation Slip part in Form 1.

Payment Period:
3.4 Note

1. Incomplete or incorrect application forms and documents will not be accepted.
2. The above mentioned items of the application are not substitutable once they have been received by the Student Section in the Faculty of Engineering, Tottori University.
3. Under any circumstances, the application forms, documents and examination fee cannot be returned to the applicant once they have been received by the Student Section in the Faculty of Engineering, Tottori University.
4. Application should be written either in block capitals or typed.

The Second Period Application is from Wednesday, November 2 to Friday, November 11, 2016.
4. Screening

4.1 Screening Procedure

Preliminary screening for admission will be made on the basis of the submitted documents. Applicants who pass this preliminary screening will be notified to take a subsequent written examinations in the following subjects and an oral examination.

1. Course of Mechanical and Aerospace Engineering
   Thursday, December 1, 2016
   (1) Mathematics / 9:00-11:00
   (2) Mechanical and Aerospace Engineering Field
       One from the following subjects / 12:30-14:30
       ▪ Physics for Mechanical Engineering
       ▪ Mechanics
   (3) Oral Examination / 15:00-

2. Course of Information and Electronics
   Thursday, December 1, 2016
   (1) Information and Knowledge Engineering Field
       Computer Architecture, Algorithm and Data Structures / 9:00-11:00
       Electrical and Electronic Engineering Field
       Electromagnetic Theory, Electric and Electronic Circuits / 9:00-11:00
   (2) Mathematics / 11:30-13:30
   (3) Oral Examination / 15:00-

3. Course of Chemistry and Biotechnology
   Thursday, December 1, 2016
   (1) Applied Chemistry Field
       Organic Chemistry, Inorganic Chemistry, Physical Chemistry / 9:00-13:00
       Biotechnology Field
       Two from the following four subjects / 9:00-13:00
       ▪ Microbiology
       ▪ Biochemistry
       ▪ Organic Chemistry
       ▪ Physical Chemistry / Structural Biology
   (2) Oral Examination / 14:00-

4. Course of Social Systems and Civil Engineering
   Thursday, December 1, 2016
   (1) Mathematics / 9:00-10:30
   (2) Social Systems Engineering Field
       Social Systems Engineering / 10:45-11:55
       Civil Engineering Field
       One from the following four subjects / 13:00-14:10
       ▪ Structural Mechanics
       ▪ Hydraulics
       ▪ Soil Mechanics
       ▪ Structural Materials and Concrete Structure
   (3) Oral Examination
       Social Systems Engineering Field / 13:00-
       Civil Engineering Field / 14:40-

Venue: Department of Engineering, Graduate School of Sustainability Science (Faculty of Engineering Building), Tottori University, 4-101 Koyama Minami, Tottori 680-8552, Japan
Note.

1. Applicants should bring the Admission Card with them to the venue of examination. The Card should be placed on the designated desk during the written examination.

2. Applicants are requested to enter the examination room by 8:45. The information regarding examination rooms and others, will be posted on the notice board of the Department of Engineering, Graduate School of Sustainability Science (at the main entrance of the Faculty of Engineering Building) on the day of the written examination.

3. Late-comers to the examination may be allowed to take examination only if he or she arrives the venue of examination no later than 30 minutes after the examination starting time.

4. Information including locations of examination rooms will be posted at the notice board at the main entrance of the Faculty of Engineering Building from 15:00 the day before the examination.

4.2 Preliminary Consultation for Handicapped Applicants

Applicants with physical disabilities, who need some specific assistances during the examination as well as study terms after entrance, must submit a document (written in arbitral format) including the following items and a medical certificate prepared by a physician to Student Section in faculty of Engineering, Tottori University by Friday, October 28, 2016, as the applicants may need attention during the examination and while attending graduate school.

1. Name of applicant, address and telephone number
2. School from which you graduated
3. Course and Field of your choice
4. Type and degree of disability
5. Attention needed upon examination
6. Attention needed while attending graduate school
7. Measures and supports provided at previous schools
8. Conditions of daily life

In addition, if Tottori University sees the need, the university will have interviews with the applicants or people from their current or previous schools, or other related persons, who are able to speak on behalf of the applicants.

5. Notification of Results

The results of the screening will be put on the web site of Tottori University around 11:00 on Thursday, December 22, 2016. (http://www.adm.zim.tottori-u.ac.jp/).

The notifications of acceptance will be mailed to the successful applicants, except for the student currently attending Tottori University to whom the notification will be handed directly at Student section in Faculty of Engineering. Inquiries about the results by other means such as phone is not available.

Detailed information concerning registration after acceptance will be informed to the successful applicants in early March, 2017.
6. Admission and Tuition Fees

1. Admission Fee*: 282,000 yen (planned amount. Must be paid at the time of registration. Not refundable.)
2. Tuition Fee*: 535,800 yen for per year (planned amount)

Note.
1. University admission and tuition fees above are estimates only. In cases where fee adjustments are announced while students are entering university or when they are already enrolled, students will be requested to pay the adjusted fees.
2. The method for paying tuition fee will be announced later when you are guided for university entrance procedure guide.

7. Inquiries

Any inquiries related to the application to Department of Engineering, Graduate School of Sustainability Science, Tottori University, should be made by mail to Student Section in Faculty of Engineering, Tottori University, given below.

Student Section in Faculty of Engineering
Department of Engineering, Graduate School of Sustainability Science
Tottori University
4-101 Koyama-Minami, Tottori, 680-8552 Japan
Phone: +81-857-31-6761
E-mail: en-daigaku@adm.tottori-u.ac.jp

*4 Foreign students supported by a scholarship from Japanese Government are exempt from the admission and the tuition fees.
Appendix
Application Procedure for Postgraduate Research Students to
Department of Engineering
Graduate School of Sustainability Science, Tottori University

Those who aim to study a specific subject at the postgraduate level may be admitted as Postgraduate Research students. The students in this category are not entitled to any degrees even upon the completion of their study program. However, Graduate School would advise them to prepare for the degree program of Graduate School depending upon their qualifications. The same qualifications are required of a prospective Postgraduate Research Student as are required of a degree candidate for the Master's program. Applicants for Postgraduate Research Students should submit the following documents to Student Section in Faculty of Engineering well in advance.

1. Application Form for Admission
2. Curriculum vitae
3. Transcript of degree or graduation certificate issued by the university or college you have (had) attended.
4. Transcript of scholastic record issued by the university or college attended. This should be a confidential communication between the university or college you have (had) attended and Graduate School of Tottori University.
6. Certificate of registered matters on the original registration.
7. Letter of permission for application written by the employer, if the applicant is an employee.
8. Application fee of 9,800 yen. In the case of application by mail, payment can be made by postal money order (do not fill in the remitter’s name).

Selection will be made on the basis of the documents submitted.

Time of admission for Postgraduate Research Students is normally the beginning of each semester, that is, April or October. The period of registration is up to one year, but may be extended if necessary.

Successful applicants are requested to pay the following admission and research fees before admission.

1. Admission Fee: 84,600 yen (planned amount)
2. Research Fee: 29,700 yen per month (planned amount)

Applicants who wish to know more details are advised to inquire by mail to Student Section in Faculty of Engineering given below or Chairman of Course concerned. A self-addressed envelope with 362 yen stamps should be enclosed.

Student Section in Faculty of Engineering
Department of Engineering, Graduate School of Sustainability Science,
Tottori University
4-101 Koyama-Minami, Tottori, 680-8552 Japan
Phone: +81-857-31-6761
E-mail: en-kyoumu@adm.tottori-u.ac.jp

※1 About six months before the time of admission for taking ample processing time to enter into Japan are strongly recommended.
Course of Mechanical and Aerospace Engineering

Possessing the human resources necessary for meeting a wide variety of needs in engineering fields, Course of Mechanical and Aerospace Engineering nurtures high-level engineers and researchers who are able to develop technologies from an interdisciplinary perspective, rather than from a stereotyped viewpoint. They are not restricted to just mechanical engineering, but are also proficient in the fields of aerospace, material, electronic, information, and environmental engineering. This course allows students to acquire high-levels of expertise and engage in original research; this enables them to develop so that they can aggressively assume leadership in solving problems. Specifically, students are trained to acquire the following:

(1) A broad and fundamental knowledge of mechanical engineering, and also advanced expertise in applied mathematics, mechanics, and physics, that provide a foundation for entering advanced interdisciplinary engineering fields such as space engineering

(2) A flexible way of thinking and insight to view problems macroscopically by considering the harmony between the natural environment and human society, and also leadership to solve problems systematically.

Applicants are expected to appreciate this policy and to be highly motivated. They are required to possess academic attainments in mathematics and physics employed in engineering as well as linguistic ability.

Mechanical and Aerospace Engineering Field

Solid mechanics, Materials science and engineering, Reliability and design engineering, Precision and production engineering, Mechanical dynamics and mechatronics, Control and robotics, Thermal energy engineering, Fluid engineering, Fluid dynamics, Condensed matter physics, Non-linear dynamics, Nanomechanics, Biomechanics, Thermodynamics
Course of Information and Electronics

There are two Fields in this Course aiming to produce engineers and researchers as listed below.

Information and Knowledge Engineering Field

We aim to produce IT engineers and researchers who have the ability to create advanced information-oriented society of the future and bring it to practice. Especially, we focus on producing human resources with the balanced knowledge of both hardware and software through the education of advanced computer, its application to intelligent system, and others. We have the research and educational program from the basic to the application covering various computer related areas such as construction of intelligent system, advancement of computer system and computer aimed technology.

Electrical and Electronic Engineering Field

We cover a wide range of technologies such as highly efficient device, advanced communication technology, software and hardware, and aim to produce world class engineers. In detail, our aims can be pointed out as follows:

① better technical knowledge of electric and electronics
② basic intellectual and ethical ability
③ ability to discover difficult problems and their solution
④ spirit to serve the international society

We accept those students who are interested in electric and electronics fields.

Course of Chemistry and Biotechnology

The goal of Course of Chemistry and Biotechnology is to educate engineers and researchers who are competent in the fields of industrial chemistry and biotechnology. To this end, Course provides students with a highly specialized curriculum at the graduate level. Course is composed of two fields, Applied Chemistry and Biotechnology.

Applied Chemistry Field

We have classes that teach basic concepts in organic, inorganic, and physical chemistries, followed by advanced classes for organic and inorganic materials chemistry, organic and inorganic synthetic chemistry, catalyst chemistry, and electrochemistry. In addition, we place an emphasis on hands-on training under laboratory conditions in addition to classroom teaching to experience
and analyze various chemical processes.

**Biotechnology Field**
Our goal is to provide students with knowledge that would allow them to seek new ways to combine nature and human society in harmonious ways, through the discovery of novel reactive mechanisms and useful compounds at the interface of biology (the study of living organisms and living systems) and engineering (the application of scientific principles to industry). Specifically, provides classes to apply the various mechanisms in bacterial or various cellular metabolism and replication to the production of various compounds and polymers, as well as to the removal of harmful chemicals from the environment. Any student who enters this field is assigned to a laboratory, and he/she will undergo basic training to become an engineer or a researcher through performing cutting-edge research.

We welcome students who possess a demonstrable grasp of scientific principles and techniques at the university level, and who are interested in becoming an active engineer or researcher in fields related to chemical industry, nanotechnology, biotechnology, and bioscience.

**Course of Social Systems and Civil Engineering**
Objective of Course of Social Systems and Civil Engineering is to train engineers who not only create abundant society through wide-ranging practices of improvements to the infrastructure, creation and activation of safety local community, but also pursue soft and hard wares methodology to create comfortable and active society by the education of highly-professional knowledge/technology and researches.

**Civil Engineering Field**
This field cultivates skillful engineers who have knowledge of plan, design, construction and management of social infrastructures. To achieve the objective, this field seeks motivated, wide perspective and problem-solving oriented persons who are eager to learn the construction technology which supports manufacturing activities, who are interested in creating space for human living, and who consider harmony with the nature.

**Social Systems Engineering Field**
This field aims at training engineers who can contribute to realization of better society through planning and design of systems on urban, traffic, environment, disaster prevention, management, production, and telecommunication. Objective of the training is to provide students with the ability for solving problems with an engineering approach comprising humanities and social science, and learning systematic consideration to solve problems in the modern society. field seeks students who have a passion to realize comfortable life and abundant society, who have idea looking things analytically and also who have strong will to overcome difficulties with elaborate systematic means.
Organizational Structure of Doctoral Program

Graduate School of Engineering, Tottori University

(1) Department of Mechanical and Aerospace Engineering
   (a) Mechanical Engineering Course
   (b) Applied Mathematics and Physics Course

(2) Department of Information and Electronics
   (a) Information and Knowledge Engineering Course
   (b) Electrical and Electronic Engineering Course

(3) Department of Chemistry and Biotechnology
   (a) Applied Chemistry Course
   (b) Biotechnology Course

(4) Department of Management of Social Systems and Civil Engineering
   (a) Civil Engineering Course
   (b) Social Management Engineering Course
YEAR 2017
APPLICATION FOR FOREIGN STUDENT ADMISSION
Department of Engineering,
Graduate School of Sustainability Science, Tottori University

Master’s Field
(April entrance)

2017年度鳥取大学大学院持続性社会創生科学研究科工学専攻博士前期課程（4月入学）
外国人留学生特別入試願書

Instruction (記入上の注意)
1. Application should be written either in ink or by a ball-point pen
   (either in black or blue only).
   （記入にあたっては、必ずインク又はボールペン（青又は黒）を使用してください。）
2. Application should be printed either in Japanese or in Roman block capitals.
   （記入にあたっては、楷書又はローマ字（大文字）を用いてください。）
3. Numbers should be written in Arabic Figures.
   （数字は算用数字を用いてください。）
4. Year should be written in the Anno Domini system.
   （年号はすべて西暦としてください。）
5. Proper noun should be written in full, and not be abbreviated.
   （固有名詞はすべて正式な名称とし、一切省略しないでください。）
YEAR 2017 APPLICATION FOR FOREIGN STUDENT ADMISSION

Department of Engineering,
Graduate School of Sustainability Science, Tottori University
Master’s Program
(April entrance)

1. The Course of your choice: Select one course

2. The Field of your choice: Select one Field

3-1. Name in full, in vernacular

(Family name) (First name) (Middle name)
In Roman capitals:

(Family name) (First name) (Middle name)

3-2. Nationality

3-3. Sex

[ ] Male (男) [ ] Female (女)

3-4. Date of Birth:

(Year) (Month) (Day)

4. Present address, telephone number, fax number, and e-mail address

(現住所及び電話、ファックス番号又は電子メールアドレス)

5. Name of desired academic supervisor

* Leave blank (この欄には記入しないでください。)
6. **Academic background** (学歴)

 ・Production of lignocellulose-degrading enzymes, ethanol and xylitol by basidiomycetes  
 ・Pathway engineering for the production of functional isoprenoids  
 ・Functional characterization of isoprenoid biosynthesis genes in higher plants and microalgae  
 ・Production of useful materials by microalgae |
| Protein Engineering      |                                          | KAWATA, Yasushi  
 MIZOBATA, Tomohiro | ・Structure and function of enzyme and protein  
 ・Protein folding  
 ・Protein stability and conformational change  
 ・Molecular chaperone and protein fibrillogenesis (aggregation)  
 ・Structure and function of enzyme and protein  
 ・Protein folding  
 ・Protein stability and conformational change  
 ・Molecular chaperone and protein fibrillogenesis (aggregation)  
 ・Structure and function of enzyme and protein  
 ・Protein folding  
 ・Protein stability and conformational change  
 ・Molecular chaperone and protein fibrillogenesis (aggregation) |
| Bioorganic Chemistry      |                                          | KISE, Naoki  
 SAKURAI, Toshihiko | ・Enantioselective synthesis of physiologically active compounds  
 ・Stereo selective synthesis using electron transfer reaction  
 ・Organic synthesis of functional biomacromolecules  
 ・Design and characterization of supramolecular biomaterials  
 ・Enantioselective synthesis of physiologically active compounds  
 ・Stereo selective synthesis using electron transfer reaction  
 ・Organic synthesis of functional biomacromolecules  
 ・Design and characterization of supramolecular biomaterials  
 ・Enantioselective synthesis of physiologically active compounds  
 ・Stereo selective synthesis using electron transfer reaction  
 ・Organic synthesis of functional biomacromolecules  
 ・Design and characterization of supramolecular biomaterials  
 ・Enantioselective synthesis of physiologically active compounds

振込依頼書

| ご依頼日欄 | 振込年月日を記入してください。 |
| 振込先欄 | 山陰合同銀行鳥取営業部又は鳥取銀行湖山支店のどちらかを選択印を付けてください。
| ご依頼人欄 | 受験者本人の氏名（カナ欄及び漢字欄）を、丁寧に記入してください。

住所欄は、郵便番号及び電話番号もご記入願います。

※ 第1回入学試験を志願する者は平成28年9月8日（木）～平成28年9月23日（金）までに、第2回入学試験を志願する者は平成28年11月2日（水）～平成28年11月11日（金）までの期間に振込みをしてください。

※ 必ず銀行窓口（郵便局、ゆうちょ銀行を除く。）で払い込んでください。（ATMは利用しないでください。）

※ 手数料は振込者負担となりますのでご了承ください。

記入要領等

電信扱振込依頼書

| 電信扱 | 山陰合同銀行 鳥取営業部
| 普通 | 3008393
| 鳥取銀行湖山支店 | 普通 | 0045136

受取人
国立大学法人 鳥取大学

※ 金融機関様へ
必ず依頼人の研究科コード及び氏名（カナ）を打電してください。

検定料振込書

| ご依頼日 | 平成年月日 |
| 金額 | ¥30000

振込先
山陰合同銀行 鳥取営業部 普通 3008393
鳥取銀行湖山支店 普通 0045136

受取人
国立大学法人 鳥取大学

検定料振込証明書（大学提出用）

| ご依頼日 | 平成年月日 |
| 金額 | ¥30000

振込先
山陰合同銀行 鳥取営業部 普通 3008393
鳥取銀行湖山支店 普通 0045136

受取人
国立大学法人 鳥取大学

※本票は、出願書類に貼り付けし、大学へ提出してください。
