Admission Policy

• The Graduate School of Sustainability Science

The Graduate School of Sustainability Science (master's program) at Tottori University widely accepts graduate students stated in the following by conducting various entrance examinations in this graduate course:

1. Those who have achieved expertise and skills in the undergraduate courses on regional sciences, engineering, agricultural science, or dryland science
2. Those who aspire to obtain a broad perspective and deep knowledge of global and local issues in the creation of a sustainable society
3. Those who, with high ethical standards, aim to contribute to the creation and development of a sustainable society in cooperation with others
4. Those who aspire to acquire communication skills to collaborate with other fields in order to create a sustainable society, taking advantage of their respective expertise

• Department of Dryland Science

The Department of Dryland Science of the Graduate School of Sustainability Science at Tottori University widely accepts graduate students stated in the following by conducting various entrance examinations in this department:

1. Those who have achieved expertise and skills equivalent to those in the undergraduate course on dryland science
2. Those who aim to obtain a broad perspective and deep knowledge of global and local issues in the creation of a sustainable society
3. Those who aim to contribute to the creation and development of a sustainable society by acquiring high ethical standards
4. Those who aspire to acquire communication skills to collaborate with other fields in order to create a sustainable society, taking advantage of their respective expertise in dryland science
5. Those who desire to contribute by themselves to solution of issues that minority group and people under severe environment are facing, understanding diversified natural environment, culture, and values

According to this admission policy, the Department of Dryland Science selects graduate students multi-directionally and quantitatively with the evaluation method shown in the annexed table.

Academic Year of 2024 Master's Program Department of Dryland Science
Graduate School of Sustainability Science, Tottori University
General Entrance Examination (1st round) Application Requirements

1. Department, Courses, Positions Available, Field of Education and Research

Department	Course	Positions Available	Field of Education and Research
Department of Dryland Science	General Program	20	See “List of Fields of Education and Research” on page 25.
	Special Program in English		

The General Program will develop scientists with advanced level technical knowledge and global perspective for societal contributions.

The Special Program in English will offer the whole course work in English to develop scientists with advanced skills to carry out projects that can contribute to the international society.

2. Qualification Requirements

Applicants must fulfill one of the criteria given from (1) to (10) below. International students who wish to apply for the General Program must be proficient in Japanese.

- (1) Graduated or expected to graduate from a university prescribed in the School Education Law Article 83 on or before the end of March 2024.
- (2) Awarded or expected to be awarded a bachelor's degree by the National Institution for Academic Degrees and Quality Enhancement of Higher Education following the School Education Law Article 104 Clause 7 on or before the end of March 2024.
- (3) Have finished or expected to finish 16 years of formal education in a foreign country on or before the end of March 2024.
- (4) Have finished or expected to finish 16 years of formal education of a foreign country on or before the end of March 2024 by completing Correspondence Education courses provided by the country in questions while residing in Japan.
- (5) Have finished or expected to complete a program provided by an educational institution which owns degree programs offered in foreign countries (only the program that grants the diploma for 16 years of formal education in the said foreign country) which is also recognized as a formal educational institution in the said county while authorized by the Minister of Education, Culture, Sports, Science and Technology on or before the end of March 2024.
- (6) Have been awarded or expected to be awarded a degree equivalent to bachelor's by completing program duration of which is more than 3 years (includes the case of finishing 16 years of formal education of a foreign country by completing Correspondence Education courses provided by the country in question while residing in Japan, and the case of obtaining degree specified by (5) when graduating from an educational institution recognized by the foreign country in question) at a university or other form of school in a foreign country (limited to the institutions with their educational quality such as education and research activities recognized by the evaluators approved by the government of the foreign country in question or other relevant authorities, or institutions specifically recognized by its equivalent by the Minister of Education, Culture, Sports, Science and Technology) on or before the end of March 2024.
- (7) Have finished upper-level course of a specialized training college (limited to the course duration of which is more than 4 years and meets other requirements provided by the Minister of Education, Culture, Sports, Science and Technology), which is specially approved by the Minister of Education, Culture, Sports, Science

and Technology, after the date provided by the Minister of Education, Culture, Sports, Science and Technology or be expected to finish above mentioned course before the end of March 2024.

- (8) Specially recommended by the Minister of Education, Culture, Sports, Science and Technology (Public notice Item 5 by Ministry of Education on February 7, 1953)
- (9) Reach or have reached 22 years old on or before March 31, 2024 whose qualification is recognized to be equivalent or higher than those who graduated from a four-year university program by individual qualification evaluation at the Graduate School of Sustainability Science.
- (10) Admitted to a graduate school by the School Education Law Article 102 Clause 2, and one's academic performance is recognized to be suitable for the Graduate School of Sustainability Science.

Applicants who are applying under (9) or (10) category must visit the Academic Affairs Section of Faculty of Agriculture, Tottori University and get an application form for evaluation of qualification which should be submitted no later than Monday, May 15, 2023. The result of evaluation will be announced by Monday, May 29, 2023.

3. Application

(1) Period

Applications must be submitted from Thursday, June 8 to Wednesday, June 14, 2023.

Reception hour is from 9 a.m. to 5 p.m.

Mailed applications will be accepted only when postmarked by the sending office on or before Saturday, June 10, 2023.

(2) Place of Submission

4-101 Koyama-cho Minami, Tottori JAPAN 680-8553

Academic Affairs Section, Faculty of Agriculture

Tottori University

Tel: (0857) 31-5342 E-mail: ag-kyoumu@ml.adm.tottori-u.ac.jp

Academic Year of 2024 Master's Program Department of Dryland Science
Graduate School of Sustainability Science, Tottori University
Special Entrance Examination Application Requirements

Department of Dryland Science is conducting a Special Examination to recruit creative, independent and enthusiastic students from both internal and external institutions and train them to produce excellent scientists. This entrance examination is open for adults with careers and international students.

1. Department, Courses, Positions Available, Field of Education and Research

Department	Course	Positions Available	Field of Education and Research
Department of Dryland Science	General Program	A few	See “List of Fields of Education and Research” on page 25.
	Special Program in English		

The General Program will develop scientists with advanced level technical knowledge and global perspective for societal contributions.

The Special Program in English will offer the whole course work in English to develop scientists with advanced skills to carry out projects that can contribute to the international society.

2. Qualification Requirements

Applicants must fulfill one of the criteria given from (1) to (10) below. International students who wish to apply for the General Program must be proficient in Japanese.

- (1) Graduated or expected to graduate from a university prescribed in the School Education Law Article 83 on or before the end of March 2024.
- (2) Awarded or expected to be awarded a bachelor's degree by the National Institution for Academic Degrees and Quality Enhancement of Higher Education following the School Education Law Article 104 Clause 7 on or before the end of March 2024.
- (3) Have finished or expected to finish 16 years of formal education in a foreign country on or before the end of March 2024.
- (4) Have finished or expected to finish 16 years of formal education of a foreign country on or before the end of March 2024 by completing Correspondence Education courses provided by the country in questions while residing in Japan.
- (5) Have finished or expected to complete a program provided by an educational institution which owns degree programs offered in foreign countries (only the program that grants the diploma for 16 years of formal education in the said foreign country) which is also recognized as a formal educational institution in the said county while authorized by the Minister of Education, Culture, Sports, Science and Technology on or before the end of March 2024.
- (6) Have been awarded or expected to be awarded a degree equivalent to bachelor's by completing program duration of which is more than 3 years (includes the case of finishing 16 years of formal education of a foreign country by completing Correspondence Education courses provided by the country in question while residing in Japan, and the case of obtaining degree specified by (5) when graduating from an educational institution recognized by the foreign country in question) at a university or other form of school in a foreign country (limited to the institutions with their educational quality such as education and research activities recognized by the evaluators approved by the government of the foreign country in question or other relevant

authorities, or institutions specifically recognized by its equivalent by the Minister of Education, Culture, Sports, Science and Technology) on or before the end of March 2024.

- (7) Have finished upper-level course of a specialized training college (limited to the course duration of which is more than 4 years and meets other requirements provided by the Minister of Education, Culture, Sports, Science and Technology), which is specially approved by the Minister of Education, Culture, Sports, Science and Technology, after the date provided by the Minister of Education, Culture, Sports, Science and Technology or be expected to finish above mentioned course before the end of March 2024.
- (8) Specially recommended by the Minister of Education, Culture, Sports, Science and Technology (Public notice Item 5 by Ministry of Education on February 7, 1953)
- (9) Reach or have reached 22 years old on or before March 31, 2024 whose qualification is recognized to be equivalent or higher than those who graduated from a four-year university program by individual qualification evaluation at the Graduate School of Sustainability Science.
- (10) Admitted to a graduate school by the School Education Law Article 102 Clause 2, and one's academic performance is recognized to be suitable for the Graduate School of Sustainability Science.

Applicants who are applying under (9) or (10) category must visit the Academic Affairs Section of Faculty of Agriculture, Tottori University and get an application form for qualification evaluation which should be submitted no later than Monday, October 2, 2023. The result of evaluation will be announced by Monday, October 23, 2023.

3. Application

(1) Period

Applications must be submitted from Thursday, November 2 to Wednesday, November 8, 2023.

Reception hour is from 9 a.m. to 5 p.m.

Mailed applications will be accepted only when postmarked by the sending office on or before Sunday, November 5, 2023.

(2) Place of Submission

4-101 Koyama-cho Minami, Tottori JAPAN 680-8553

Academic Affairs Section, Faculty of Agriculture

Tottori University

Tel: (0857) 31-5342 E-mail: ag-kyoumu@ml.adm.tottori-u.ac.jp

(3) Application Procedures

Applicants must submit the documents listed in the table below by yourself or mail. Applicants should use appropriate forms: For the General Program application, use the Japanese form. For the Special Program in English application, use the English form.

Applicants must contact his/her prospective primary supervisor before submitting the application form. Application submitted by mail should use registered mail and has to be marked "Application for Department of Dryland Science Enclosed" in red ink.

List of Fields of Education and Research

Department	Course	Field of Education and Research	Faculty Member	Keyword 1	Keyword 2	Keyword 3	Keyword 4	Keyword 5
Department of Dryland Science	General Program/ Special Program in English	Sustainable Land Management	Nigussie Haregeweyn Ayehu	Land degradation	Sustainable land management	Integrated watershed management	Spatial analysis	Hydrologic modeling
		Soil and Water Management	Koji INOSAKO	Restoration of farm land	Soil-Plant-Atmospheric continuum system	Irrigation and drainage	Desalinization	Environmental biophysics
		Dryland Environmental Resources	Tsuneoyoshi ENDO	Soil resources	Irrigated agriculture	Behavior of salts	Soil salinization	Environmental remediation
		Construction and Management Engineering of Facility in Rural Regions	Hidehiko OGATA	Irrigation and drainage facilities	Farm road	Functional diagnosis	Stock management	Frost damage
		Dryland Climatology	Yasunori KUROSAKI	Climatology & meteorology	Aeolian dust	Wind erosion	Climatic variation	Desertification
		Agricultural Water Use and Management	Katsuyuki SHIMIZU	Agricultural water use	Field hydrology	Assessment of water delivery performance	Soil salinization	Micro hydropower
		Molecular Breeding	*Hisashi TSUJIMOTO	Wheat	Stress tolerance improvement	Germplasm enhancement	Chromosome engineering	Food shortage
		Conservation Informatics	Atsushi TSUNEKAWA	Environmental evaluation and modeling	Remote sensing	GIS	Regional environmental planning	Sustainable Land Management
		Climate Risk Management	Mitsuru TSUBO	Agrometeorology	Micrometeorology	Crop model	Drought	Climate-smart agriculture
		Dryland Salinity and Landscape Restoration	Kristina Toderich	Biosaline Agriculture	Global drylands pastoralism	Phytoremediation	Crops-Livestock interaction	Food and Gender
		Crop Production in Drylands	Eiji NISHIHARA	Medicinal plants	Allelopathy	Mitigation of replant problem	LED light in plant factory	Biochar
		Irrigation and Drainage in Drylands	Haruyuki FUJIMAKI	Water-saving irrigation	Water harvesting	Leaching	Salinization	Erosion
		Agricultural Development Studies	Kumi YASUNOBU	Area studies	Farm management studies	Technology diffusion	Rural development	Common resource management
		Plant Nutrition	Satoshi YAMADA	Salinity	Mineral absorption	Crop quality	Aquaponics	Water saving
		Revegetation Science in Drylands	*Norikazu YAMANAKA	Revegetation in arid areas	Ecosystem restoration	Forest ecology	Drought and salt tolerance of woody plants	Water relations of plants
		Environmental soil science	Sadahiro YAMAMOTO	Conservation oriented agriculture	Salt affected soils	Soil quality assesment	Soil organic matter	Soil formation and classification
		Plant Eco-Physiology	Ping An	Environmental stresses	Tolerance Mechanisms	Dry lands agriculture	Saline soils	Halophytes
		Plant Cytogenetics	Takayoshi ISHII	Germplasm enhancement	Wide hybridization	Chromosome elimination	Genome editing (CRISPR)	New breeding techniques (NBT)
		Dryland Health and Medicine	Shinji OTANI	Global health	Environmental medicine	Travel medicine	Infectious disease	Noncommunicable diseases
		Dryland Restoration and Conservation Ecology	Toshihiko KINUGASA	Arid and semi-arid grassland	Global environmental change	Human disturbance	Secondary succession	Plant matter production
		Meteorology in Drylands	Reiji KIMURA	Climatology-Meteorology	Land atmosphere interaction	Atmospheric boundary layer	Satellite	Hazard map
		Land Environment and Conservation	Tadaomi SAITO	Soil water and solute movement	Interaction among soil, water and vegetation	Soil erosion	Environmental measurement techniques	UAV(Drone)
		Renewable Energy Engineering	Kotaro TAGAWA	Solar and wind energy	Energy generation and conversion	Evaluation of energy system	Desalination	Heat and mass transfer
		Microbiology in Drylands	Takeshi TANIGUCHI	Microbial ecology	Ecosystem restoration	Use of rhizosphere microorganisms	Metagenome	Mycorrhizal fungi
		Agricultural Extension Studies	Asres Elias Baysa	Agricultural extension studies	Gender and development	Agricultural economics	Rural development	Africa
		Facilities and Environmental Materials	Masahiro HYODO	Buried pipe	Evaluation of the residual strength	Environmental materials	Restoration of aquatic environment	Industrial by-product
		Remote Sensing Hydrology	Ayele Alemaw Fenta	Hydrology	Watershed Management	Ecosystem Services	Soil Erosion	Remote Sensing
		Applied Meteorology in Drylands	Shaoxiu Ma	Land surface modeling	Climate modeling	Big Data analysis	Climate change	Remote sensing
		Stress Tolerance Breeding	Yasir Serag Alnor	Molecular and speed breeding	Pre-breeding	Heat and salinity tolerance	Phenotyping	Omics
		Aquatic Environmental Science	Yuri YAMAZAKI	Environmental impact assessment of agricultural catchments	Nitrogen run-off control	Environmentally friendly grazing	WEBGIS-based hydrological model	UAV Smart Agriculture
		Theoretical Physics	Natsumi IKENO	Relativistic quantum mechanics	Strong interaction	Meson	Nucleus	Numerical calculation
		Terrestrial Carbon Cycle	Munemasa TERAMOTO	Global warming	Soil respiration	Carbon cycle	Terrestrial ecosystems	Greenhouse gas

* indicates professors who will retire at the end of March 2024.

Academic Year of 2024

Master’s Program Department of Dryland Science

Graduate School of Sustainability Science, Tottori University

Application Form

Examinee’s Number

※

Entrance Examination	Please circle on the item below that applys. <div>1. General Entrance Examination (1st round)2. Special Entrance Examination In-service Trainees</div> <div>3. General Entrance Examination (2nd round)4. Special Entrance Examination</div>		
Course		Tottori University Student's ID number (The applicants who have enrolled at Tottori University)	
Field of Education and Research		Name of Prospective Supervisor	
Name	JPN		
	G		
Date of Birth	yyyymmdd	Gender	Male • Female
Qualification	University Faculty (School) of Department of yyyymm Graduation / Expected Graduation / Completion / Expected Completion		
Current Address	Zip Code		
	Phone number Mobile phone number		
E-mail Address			
Result Notification Address *Do not have to list if it the same as above	Zip Code		
	Phone number Mobile phone number		

Instructions

1. Please write in ink or with a blue or black colored ballpoint pen.

2. Fill all columns except for the ones marked with “※” and circle on the items that apply.

3. All applicants must communicate with their prospective primary supervisor of desired Field of Education and Research before submitting the application form.

Please contact Academic Affairs Section of Faulty of Agriculture, Tottori University (contact information on the cover of this book) when you cannot contact the prospective primary supervisor.

Graduate School of Sustainability Science, Tottori University

Submission Sheet of Proof of Examination Fee Payment

- ◎Please paste Proof of Examination Fee Payment with a paid date stamp.
(Please do not paste Receipt Confirmation of Examination Fee that applicants are supposed to keep.)
- Please be aware to make a transfer at a bank reception. (Do not use ATM machine.)
- Proof of Examination Fee Payment without a paid date is invalid.

Instructions

Date of Request (依頼日) : Please fill in the date of remittance.

Beneficiary(振込先)
: Please circle on either San-in Godo Bank Tottori Business
or Tottori Bank Kovama Branch(鳥取銀行湖山支店).

Applicant's Information(ご依頼人) : Please fill in your name correctly in the name columns.

: Please provide zip code and phone number as well in the address column.

※※ Please remit fees according to the period of payment.

⌘ Do not use ATM machines.

✘ Please be aware that the bank transfer fees for payment shall be borne by applicants.

✕Please tear off on the perforated line.

Period of Payment

***Please remit the fee according to the following**

General Entrance Exam (1st): Thursday, June 1 - Wednesday, June 14, 2023

Special Entrance Exam for
In-service Trainees:
Thursday, June 1 - Wednesday, June 14, 2023

General Entrance Exam (2nd): Monday, August 21 - Thursday, August 31, 2023

Special Entrance Exam: Thursday, October 26 - Wednesday, November 8, 2023
